

## SCANEVENT

We used ScanEvent for the first time at an event we had not handled before. The exhibitor base was very high profile and very high tech so we were concerned that we were taking a risk. As we prepared for the show we were impressed with the high level of customer support we received from the ScanEvent team. And all of our exhibitors were very impressed with the size of the scanners and the ease/reliability of use. We will use ScanEvent for all future trade shows!

**Global Executive**

ScanEvent is a highly cost-effective and user friendly lead retrieval solution. Due to its open nature, it fits well with Tziranda's other product and service offerings to the events industry. We will continue to offer ScanEvent within our portfolio to all our clients in Europe.

Congratulations to all of you as well - Scanevent was a smashing success at Breakaway XChange! (We had several vendors who nominated Scanevent for our "Best of Show" award - despite the fact that you were not a sponsoring vendor!!!) I know our audience appreciated the technology and application - I received fantastic feedback.

I know we all learned a great deal on how we can improve on things for future events - and I appreciate all of your hard work at the event to ensure that our audience enjoyed a flawless operation.
